SUMMARY

Experienced Front End Developer with 2 years of professional experience. Known for creating user-friendly, responsive, and visually appealing applications. Skilled in HTML, CSS, JavaScript, React Native, and React.

EXPERIENCE

Front End Developer | Agricultic

March 2023 - Present, La Vega, Dominican Republic

• Transform figma designs into actual interactive components using Javascript, React/ Nextjs, and TailwindCSS.

• Integrated back-end API endpoints with front-end components, enabling server-side functionalities. This integration enhances the overall performance and functionality of the application, ensuring a more fluid and efficient user experience."

• Improved the website's user experience by optimizing navigation elements such as cards and buttons. This resulted in a smoother and seamless browsing experience, which will enhance user engagement once the page has launched. A/B tested with 50 users resulting in a 20% increase in positive user feedback.

React Native Developer | Applaudo Studios

March 2022 - March 2023, San Salvador, El Salvador

• Build and implement user interfaces using React and React Native frameworks. This involved writing clean, efficient, and maintainable code to create interactive components and screens.

• Collaborated with designers and product teams to transform design mockups and wireframes into fully functional UI components and mobile app screens.

• Collaborated with Back-End developers to integrate front-end code with server-side APIs, ensuring seamless data transfer and functionality.

• Developed and launched React Native applications, resulting in a user interface with high performance and scalability.

PROJECTS

Personal Portfolio | Personal Project

https://sorraimirivas.vercel.app/, September 2023 -October 2023

• Implemented the UI, transitions and animations.

• Design the website theme including light mode and dark mode for accessibility purposes.

• Used SEO best practices to improve website reach.

TMDB Mobile | Personal Project

https://github.com/SorraimiRivas/tmdb-mobile-unofficial.git, September 2023 - October 2023

• Designed and implemented the UI elements across the app.

• Implemented the API integration with the TMDB public API so users can consume the content.

• Built the navigation flow using best practices to ensure a smooth navigation between screens.
